

# **ENERGY MANAGEMENT SYSTEM POLICY**

KOROZO A.Ş. is dedicated to improve energy density and energy performance in all our production processes. In order to translate this value into practice, we focus on continuous improvement, set goals and targets according to these principles. In line with these principles, we are committed to

1. Measuring, analyzing and controlling significant energy uses in line with targets;
2. Monitoring technological developments to continuously improve energy performance and savings; and using designs, equipment and systems with higher energy efficiency through advanced engineering practices;
3. Providing all employees with required training and motivating them, raising awareness to ensure effective use of natural resources with minimum waste. Creating an energy efficient work culture and providing the required environment and conditions to achieve this;
4. Working in line with legislations and other legal requirements on energy efficiency, energy consumption and energy use;
5. Monitoring our performance by proactively setting targets and continuously improving our energy performance in our processes and energy management system;
6. Contributing to protection of the Earth against global warming by reducing greenhouse gas emissions;
7. Providing information and resources to realize goals and energy-related targets;
8. Supporting the supply of energy efficient products and services that can impact energy performance.

**This policy is reviewed every year and the necessary units are revised. All Korozo employees, especially senior management, are responsible for the administration, management and supervision of this policy.**

*Valid as of 11.11.2020*
